Education

CORNELL UNIVERSITY, ITHACA

2016 – 2019

- Bachelor of Science in Computer Science, College of Engineering
- Completed Coursework: CS 2110 (OOP and Data Structures), CS 2800 (Discrete Structures), CS 3410 (Computer System Organization and Planning), CS 4820 (Algorithms), CS 4780 (Machine Learning)
- GPA: 4.1

Projects

MACHINE LEARNING PLAYGROUND

JUN 2017 – CURRENT

- Implemented multiple ML algorithms from the ground up including KNN, decision trees, neural networks and more with Javascript and math.js
- Designed a testing playground that took user input from an HTML canvas managed by a complex class structure using React and Promises, then pipelined user-designed datasets to the models for training and classification.
- Deployed as educational and promotional tool for the Cornell Data Science project team

DIGIT CLASSIFICATION CHALLENGE

MAY 2017

@ CS 4780 (Machine Learning) final project

- Experimented with different methods for classifying a toy MNIST-like digit dataset, such as Deep Net, Logistic Regression, and KNN, using both Python scripts and notebooks
- Performed Median filtering, dataset expansion and KNN for final model, with training and testing accuracy of 99%
- Achieved 99% for hidden evaluation dataset

SHOWERFY

SEP 2016

@ Big Red Hacks, Cornell

- Led development of Android app that gamified showers to reduce water usage in response to a local drought, using a timer that played music through the Spotify Android SDK
- Learned, implemented and taught Android development with Java to lead 5 person team
- Presented as one of 10 finalists out of all 30 participating groups

TRAILBLAZER

2016

- Designed and built a flexible goal-tracking front end web app, tackling the shortcomings of personal project managers currently available
- Sketched and planned out user stories and UI flow involving categorical and hierarchal organization of projects and ideas, then implemented designs using React and Less
- Deployed application using Firebase as backend and Github pages, then published on the Chrome web store as web app

Experience

MARKETING LEAD

MAY 2017 – CURRENT

@ Cornell Data Science Project Team (CDS)

- Designed informational website to promote awareness during the summer, garnering 200+ unique visits on release day
- Managing club promotion and awareness by designing quartercards, posters and more

JUNIOR SOFTWARE ENGINEERING INSTRUCTOR

MAY – AUG 2017

@ Horizons School of Technology, San Francisco

- Designed and revised curriculum covering full MERN stack (MongoDB, Express, React/Redux, Node)
- Tutored cohort of 100+ undergraduates in small group seminar settings
- Mentored students developing project and startup ideas, providing technical advice on project iteration

KAGGLE PROJECT TEAM MEMBER

JANUARY – JUNE 2017

@ Cornell Data Science Project Team (CDS)

- March Madness Kaggle prediction: Built a logistic and tree regression model to predict matchups as part of a boosted ensemble
- Allen AI project: Answering 8-th grade science multiple choice questions using NLP methods: member of Knowledge Base team, built package for interfacing with py-wikibot for query expansion

Skills

Javascript, Node.js, React/Redux, Firebase, Express, MongoDB, Sockets.io
Python, Pandas, Numpy, Scikit-Learn, XGBoost, Tensorflow + Keras
Java, C++
